

**IN THE CLAIMS**

1. (Currently Amended) A semiconductor package comprising a refined lead-free solder having an alpha flux of less than  $0.0005 \text{ cts/cm}^2/\text{hr}$ .
2. (Previously Presented) The semiconductor package of claim 1 wherein the lead-free solder predominately comprises Ag, Bi, Cu, In[[,Pb]] or Sn.
3. (Original) The semiconductor package of claim 1 wherein the solder predominately comprises Ag.
4. (Original) The semiconductor package of claim 1 wherein the solder predominately comprises Sn.

Claims 5-6: Canceled.

7. (Previously Presented) The semiconductor package of claim 1 wherein the solder predominately comprises Bi, Cu or In.
8. (Previously Presented) The semiconductor package of claim 1 wherein the solder has an alpha flux of less than  $0.0002 \text{ cts/cm}^2/\text{hr}$ .
9. (Previously Presented) The semiconductor package of claim 1 wherein the solder has an alpha flux of less than  $0.0001 \text{ cts/cm}^2/\text{hr}$ .

Claims 10-29: Canceled.
